The Grumman A-6 Intruder is a twin-engine, all-weather attack aircraft built by Grumman. Developed in the 1960s for the US Navy, the Grumman A-6 Intruder became the EA-6B Prowler, a specialized electronic warfare derivative, with the A-6 Intruder ground attack aircraft. The EA-6B Prowler is the primary tactical jamming aircraft of the US Navy, USMC, and USMC Prowlers are fitted with the Northrop Grumman Litening AT targeting pod. The Northrop Grumman formerly Grumman EA-6B Prowler is a twin-engine, four-seat, mid-wing electronic warfare aircraft derived from the A-6 Intruder.

The A-6 Intruder was a twin jet-engine, mid-wing attack aircraft built in the 1960s for the US Navy. It was delivered to the Navy in 1963 and the Marine Corps in 1964. A development contract was issued in autumn 1966 for a four-seat electronic warfare derivative, the EA-6B Prowler. The EA-6B Prowler was first US Navy attack squadron to receive the Grumman A-6 Intruder.

The EA-6 B Intruder was a carrier-based attack aircraft of the A-6 Intruder. It was the development of the EA-6 Prowler electronic warfare system. What is the difference between Intruder and Prowler? The A-6 Intruder handled the strike role for the United States Navy, and the Intruder family became the EA-6B Prowler which was given a Vietnam War designation: Grumman A-6 Intruder - ThoughtCo O Grumman A-6 Intruder.

The Intruder first flew in 1960 and was delivered to the Navy in 1963 and the Marine Corps in 1964. A development contract was issued in autumn 1966 for a four-seat electronic warfare derivative, the EA-6B Prowler.
