The Financial Crisis of 2007?2009: Causes and Remedies. Awareness of this environmental crisis has grown since the 1970s, partly as a consequence of the large environmental manifestations, their causes - and their potential solutions - are not always apparent. This paper describes the process that caused the financial credit crisis. The causes of the credit crisis were the result of poor regulation of financial institutions, high housing prices, and reduced consumer spending. The Global Financial Crisis: Lessons Learned and Challenges for the Future. The crisis was caused by the subprime mortgage crisis, which itself was caused by a series of financial missteps that led to the collapse of the housing market. The collapse of the housing market led to a decline in consumer spending, which in turn led to a decline in industrial output. The collapse of the housing market also led to a decline in the value of asset-backed securities, which in turn led to a decline in the value of the financial system. The collapse of the financial system led to a decline in the value of other assets, which in turn led to a decline in the value of the economy. The causes of the crisis were not caused by such factors as the subprime mortgage crisis. The causes of the crisis were the result of poor regulation of financial institutions, high housing prices, and reduced consumer spending. The Global Financial Crisis: Causes and Solutions. The causes of the crisis were not caused by such factors as the subprime mortgage crisis. The causes of the crisis were the result of poor regulation of financial institutions, high housing prices, and reduced consumer spending. The causes of the crisis were the result of poor regulation of financial institutions, high housing prices, and reduced consumer spending.
